

Water Treatment Engineer

We are Collier. A team oriented, family based, solution focused geoscience and engineering firm. Investing in our employees is equally as important as our commitment to our clients. Collier is seeking a licensed and experienced Water Treatment Engineer to join our dynamic team at the Stephenville or Round Rock, Texas office. This engineer must have experience in projects such as water treatment, groundwater and/or water resources. Responsibilities include supporting projects involving water treatment, well field design, water distribution design, as well as system evaluation and rehabilitation. Work will include planning, design, permitting, and construction services and will include client engagement. The selected candidate will also work closely with senior members of our team to seek new business opportunities and may serve in a lead role on various projects, depending on size and complexity.

Qualifications

- Bachelor's degree or higher in Civil or Environmental Engineering
- Minimum 2-6 years' experience
- Experience with AutoCAD and Civil 3D
- Strong technical and problem-solving skills, excellent communication skills, and attention to detail
- Demonstrated task management and project organizational skills
- Must have strong communication skills in coordinating with clients, sub-consultants, regulatory agencies, and members of the public
- Occasional business travel may be required

Why Collier

- Competitive Salary
- Paid Healthcare
- Retirement Matching
- Paid Holidays
- PTO for Volunteer Work
- Relocation Assistance (if required)
- Family Oriented Environment
- Competent and Creative Leadership
- Opportunity to Lead in a Growing, Innovative Firm
